

School Supplies M1/M2 EN

Dear Parents,

Below is the list of school supplies your child will need for the school year 2022-2023. The school supply list was simplified this year. The teacher might complete this list with a couple of essential items not mentioned here in the first two months of school. Please make sure you read the list below carefully. Some items are only required for M1s to bring, some only for M2 and not all items need to be labelled with child's name.

In preparing for the new school year, consider taking some time before the first day of school to communicate with your child about the new year to come.

If your child is in M1, talk to your child a bit about the environment at the European school and remind them how it makes sense to you that they are part of this particular school system.

If your child is an M2, try to talk with them about how it was for them last year and how much they have grown. Remind them, things will be slightly different this year and although there will be higher expectations, there are also some privileges to being M2.

Have a great school year Alma Valette
